2009 April 3

Reference letter

In 2008 JSC IDD signed a contract (Contract No. 040801/01) with APM-Telescopes to manufacture and install the telescope for Museum of Ethno cosmology of Lithuania, located in Molėtai. The 0.8 meter Ritchey Chrétien optical design was chosen combined with equatorial fork mount.

We were pleasantly surprised with flexibility and attitude of APM-telescopes towards our project. All our requirements including manufacturing of custom pieces were fulfilled within the best quality and in time of incredibly tight schedule we requested. During several visits to manufacturing plant all our questions were answered combined with tour trough manufacturing stages. The telescope installation was successfully completed on 2008 October 01 as requested.

We do believe this is not the last telescope we will buy from APM-Telescopes since the telescope at such value and quality is very hard to find elsewhere.
